

## Stock list – April 2018

We carry an ever changing stock of used, workshop machinery and equipment that can be readily supplied to the education sector as a cost-effective alternative to buying new. Items are upgraded to meet current health and safety requirements as standard, but further refurbishments, e.g. re-painting, can be carried out at an additional cost. Non-educational buyers are also welcome – please contact us to discuss your requirements.

The items listed below are a selection of items currently available. Contact us for further information and prices\*:
